

# 2001: A STUF ODYSSEY

The supremely popular and supremely cool anime catalog brought to you by the Right Stuf International, just like it is every year.

My, how the anime market has changed. Only 10 years ago, the market consisted primarily of males watching programs which were copies of copies of copies in Japanese.

Today, the awareness of anime has spread, and more and more females and children are fans. Television networks even have anime lineups, including FoxKids' "Anime Invasion", the Toonami Anime Block, and Anime on the WB. Digimon, Pokémon, Flint: The Time Detective, Monster Rancher, Tenchi Muyo, Escaflowne, Blue Submarine Number 6, Dragonball-Z, and more can be viewed almost daily.

To adapt to our changing marketplace, TRSI has done some redesigning on our printed catalog; although we want to be a one-stop shop for all of your anime needs, we realize that there are several varied groups who receive our book, and want to make it useful to your specific taste.

Since anime is a wide-ranging medium, with programming for all ages, having all of the different types of material in one book is truly a challenge. Therefore, you'll notice that all of the adult material has been placed within a sealed section. Anything rated 18+ is in this section. It is also removable, so if you do not want to view the material, or don't want your children to view it, simply rip the section out and throw it away. It's our way of being responsive to many parents' concerns about inappropriate materials.

2001 truly begins the new millennium (since there was no year 0), and we see nothing but continued growth for anime, and TRSI will grow with it to meet your anime needs. We again doubled our warehouse space this past year, and our staff keeps getting larger. Throughout the book our employees have noted some of their favorite anime picks to share with you!

No print catalog can ever really be current. To see new products, which are added daily, check our website at <http://www.rightstuf.com>, or subscribe to our purchasing club, which gives you our quarterly newsletter and additional discounts and specials. Our website also has a great deal of anime information, including current product news, specials, an e-mail notification list, product reviews, cool contests, and much more! Check it out!

Our company is dedicated to the service of our customers. If you have any comments or suggestions, on the catalog or on other matters, please email me directly. I'll be out digging for the monolith.

## The “Japan” in “Japanese animation”

-Gilles Poitras

We watch anime because we enjoy it, there is no need for any other reason to watch anything. After awhile a normal part of viewing anime is the discovery that there are things which are obviously not from ordinary U.S. life. After all anime is a product of Japan and so Japanese culture crops up again and again. This article shall deal with a few of the more commonly seen aspects of Japanese culture in anime set in modern Japan.

### The home:

As one enters a Japanese home, almost any home from a traditional farmhouse to a modern apartment, one is standing in an area lower than the rest of the home. This is called the genkan. The genkan is where you take off your shoes before going into the rest of the home. Usually you change into slippers, but socks and bare feet are common.

Meals in many homes are eaten at a low table called a chabudai, kind of like a large coffee table. Or you could just be sitting at the chabudai drinking tea and watching TV. The chabudai was developed just over a hundred years ago as a compromise between a Western table and the Japanese custom of sitting on the floor. Before the invention of the chabudai each person would have a small tray with their food or drink on it. You sit on the floor on pillows called zabuton. In the winter the chabudai is often replaced by a kotatsu which looks like a chabudai except that it has a removable top and a heater underneath. You remove the top and put a quilted blanket on the frame then put the top back on. Tuck your

legs underneath and the heater helps keep you warm. This is cheaper than heating an entire room.

Some rooms have tatami, large mats made of straw and rushes woven tightly. These are placed to fill up the floor of a room. Japanese traditional rooms are measured by the number of tatami would fit in them and are made wide and long enough so that the floor could be completely covered by these mats. Tatami make sitting on the floor easier as they are comfortable. Imagine you don't need a couch to lay down and watch TV, just lay on the floor. One thing, you never wear house slippers when walking on tatami, leave them in the hallway if you are wearing them.

When it is time to go to sleep you probably would use futon. In the United

States we often speak of various foam mattresses on folding frames as futon but in Japan a futon consists of a mattress usually stuffed with cotton, and a quilt. Place these on the tatami and crawl in-between and you have a comfortable bed. During the day the futon can be folded up and put away leaving the room available for other uses such as sitting around the chabudai.

Besides eating and sleeping there are other bodily needs to take care of in a Japanese home.

Many modern Japanese homes have Western style toilets, but many also have the traditional Japanese benjo which is a toilet directly on the floor. You don't sit on a benjo but squat over it, the Japanese consider this more hygienic than sitting on a Western style toilet seat.

Another important aspect of Japanese homes is the bath, the furo. This is almost always in a different room than the toilet, after all the two devices have little in common other than a need for plumbing. A bath in a Japanese home is often composed of two rooms. The first room is used for undressing and may also contain a washing machine for clothes. The bathroom itself has a tile floor with a drain in the middle. You wash yourself before getting into the tub. Depending on the home you may use a bucket to pour water on yourself or a hose with a shower head on it. After you wash and rinse off you soak in the tub of hot water and relax. Think of it as a hot tub in the home, after all we got the idea for the hot tub from the Japanese bath.

### School:

Another part of Japanese life commonly seen in anime is the school. The school year begins in the spring, for example in the first Ranma ½ and Oh My Goddess!

episodes the stories take place at this time of year. We know it is spring not because anyone says it is but because there are cherry blossom petals on the wind, a traditional symbol of spring.

Most schools are surrounded by a wall or fence, a tradition from earlier in Japanese history. There is a gate which is closed when school starts and late students are reprimanded by a teacher at the gate.

The school building also has a genkan, a much larger one than in the home. Students each have shoe lockers where they keep their shoes during the day and indoor shoes for wearing when in the buildings. The shoe lockers are often used as places to leave love letters and other messages, much like American students might slip a note into someone's locker at school.

Each student has a home room, but don't confuse this with the home room of American high schools. Japanese home rooms are the classroom the students stay in all day, except for classes with special needs such as P.E. science, music or art. The teachers go from class to class. Not only do the students have a home room they each have a single desk for the entire day. This means that the home room is the territory of the students not of the teachers.

Each home room has a president who coordinates chores with other class officers such as cleaning the home room. Japanese schools have few janitors, most of the cleaning is done by the students, this is considered part of the learning process. Not only do the students clean up their home room but also other parts of the school including the exterior grounds and toilets, not a popular chore.

Many schools still have uniforms. The traditional boys uniform made of dark material with a tight collar is modeled on the uniforms of German military acad-

mies in the 19th century, girls uniforms were based on a combination of a sailor's uniform and a skirt, hence the name 'sailor suit' These uniforms are also very practical as they are not very expensive when compared to regular clothes since they are mass produced and are made of very sturdy long lasting material.

Girls also have special clothing for physical education, a t-shirt and very short pants called buruma. Buruma is the Japanese way of saying bloomers, which is what young women in England and America often wore when doing P. E. in the early 20th century, around the same time girls began going to school in Japan.

### Tokyo

During the Tokugawa era the city now called Tokyo was named Edo, the name was changed after the shogun's rule was ended in 1867. Tokyo is the largest

metropolitan area of Japan, with a population of over 30 million it has more people than many states in the U.S. Culturally Tokyo is very important, imagine a city as important as New York, Chicago, San Francisco, Los Angeles and Washington D.C. put together and you have an idea how significant Tokyo is to the Japanese. For these reasons Tokyo often is the location of stories and Tokyo landmarks often show up in anime. The most recognized landmark is Tokyo Tower which resembles the Eiffel tower but is taller. Tourists line up to ride to the two observation decks for a view of the city.

Tokyo is also a city of trains as very few people have cars, automobiles are still a luxury item in many areas of Japan. It is common in anime set in Tokyo to see and hear trains and train crossings. This viewing of trains could be close as in the beginning of the first *You're Under Arrest* OVA or in the distance as in many of

the night scenes of Maison Ikkoku. In many scenes you don't even see the train but hear it or a crossing. A major train station is Tokyo Eki which is modeled after the main station in Amsterdam. This station was completed in 1914 and heavily damaged in World War II, after the war it was restored and its main entrance made available for the general public, before the war ended only the Imperial Family could use this entrance.

Political buildings also show up in anime The Japanese diet (parliament) building shows up in several anime where politics are important, such as Sanctuary, Blue Seed and Patlabor 2. More commonly seen is the Tokyo Metropolitan Government Offices, usually the twin towered Office Building Number One. The buildings, which are interconnected, contain office space for about 13,000 workers.

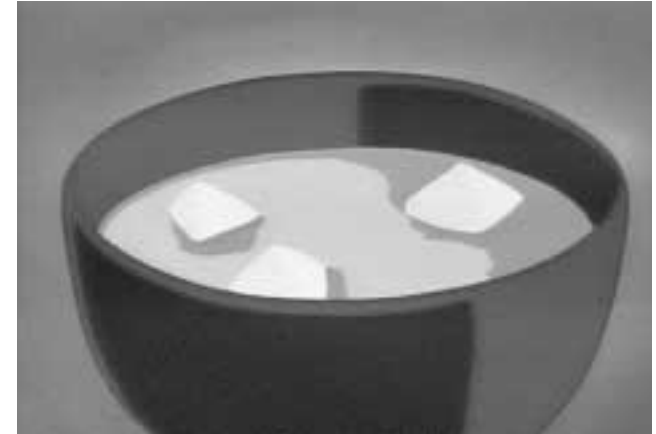

Keishichoo, the Tokyo Metropolitan Police Department, also often shows up in many anime. This building has a wedge shape being narrower at one end. The height is 18 stories with a circular tower on top containing a variety of antenna for radio and microwave communications. Almost any anime involving the police in a major way will have a scene which takes place in the building.

The Ginza is another famous area of Tokyo which shows up on occasion. The name of this area comes from a mint which had been built there in 1612, gin means silver and za means mint. In 1873 a western style promenade and shopping area was built here for the foreigners who were now living in Tokyo. Today the Ginza is a shopping area during the day and an entertainment district at night.

Another feature of Japanese urban life is the coffee shop. It is not unusual to hear how expensive coffee is in these shops but in fact if you buy a single cup of coffee you can stay in the shop all day and no one will ask you to leave. Instead they will give you a glass of water and make sure it is refilled regularly so you don't get thirsty. You can then hang out, read a book, talk to friends, have a meeting or do pretty much anything else as long as you want.

And the subject of coffee brings us to the final part of this article: Food and Drink:

More common than coffee in Japan is tea, all kinds of tea including green tea, long a popular kind in Japan, Chinese style oolong and European milk tea. Tea is drunk hot or cold, freshly made or canned and bottled, during the day or in the night. There is even a simple snack made of rice with some toppings with green tea poured over it, this is called chazuke, cha being the word the Japanese use for tea.

Perhaps the most Japanese of all meals is the traditional Japanese breakfast consisting of tea, rice, fish, miso soup and pickles.

Rice has been eaten as a major food in Japan for centuries, for most of Japanese history the value of a nobleman's or samurai lord's land was measured in bushels of rice. At one time commoners were not allowed to eat white rice, such being a status symbol reserved for nobles and samurai.

Fish is easy to understand, Japan is a group of islands about the same size as California with lots of streams and some very large lakes. Fish until recently was the major animal protein source for almost all Japanese.

Miso is made by processing soy beans by fermenting them and making a paste. Like tea and rice miso was introduced to Japan from China, possibly through Korea. The Japanese use it in several ways, the most commonly known in the West is to make soup from the miso paste. Tip: never boil miso soup, boiling spoils the flavor, instead boil the water and turn off the stove then add miso and stir.

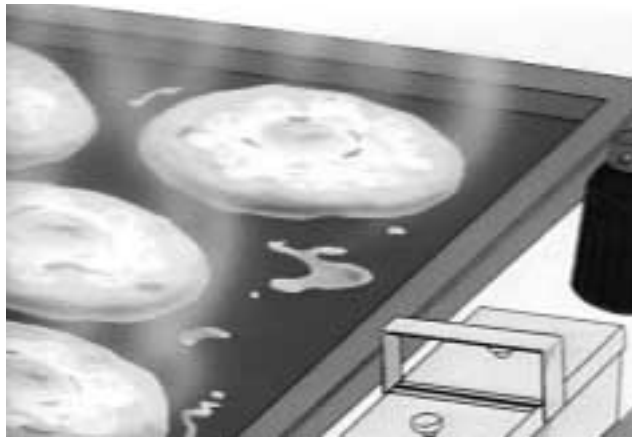

Pickles, called tsukemono in Japanese, are an important part of any traditional Japanese meal or for that matter drinking as many bars will serve tsukemono and other snacks to stimulate thirst. The Japanese have a very large number of types of pickles, probably more than any other culture in the world. Some take just a few hours to prepare some take months. Not only vegetables are pickled but seafood and some kinds of meat are sometimes pickled.

Other than sushi the food most Americans have eaten and associate with Japan is probably ramen, usually in the form of cup ramen. Ramen is actually a Chinese noodle, introduced centuries ago into Japan it is still served in Chinese bowls with

Chinese spoons. The Japan have a tradition of doing things in traditional manners. A classic example of this is the use of the traditional Chinese ceramic spoon, this spoon is still only used for Chinese foods. You just don't see Japanese eating miso or Western soup with it.

An easy to recognize food is takoyaki, tako is the Japanese word for octopus and yaki is any food cooked on a griddle. Takoyaki is made from batter containing bits of chopped octopus poured into little molds and flipped with toothpicks until a round ball is formed then a sauce is used as seasoning. Takoyaki is often sold as a take out snack.

Another easily recognized food is okonomiyaki a batter mixture cooked with shredded cabbage and any of several kinds of meat or seafood. A sauce is often used as a topping as is shredded seaweed. Okonomiyaki is sometime translated

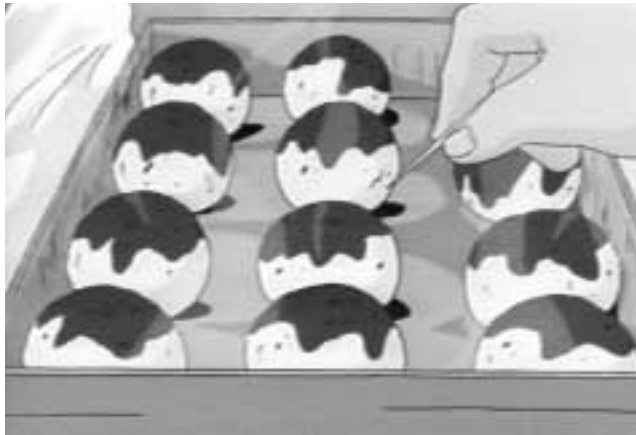

as pancake or even 'Japanese pizza' both of which are really not at all similar. This of course brings up a complaint of many fans in calling a Japanese food something other than what it is. After all anime is made in Japan so why not simply use the Japanese name for a Japanese food.

For really hot days a good treat to cool you down is shaved ice. Don't confuse this with snow cones, shaved ice has a very different texture, the ice is shaved very thin and topped with a flavoring. You eat it with a spoon, don't eat it too fast or you will get a headache.

Of course a discussion of Japanese food and drink must include a little information on sake, that most famous Japanese beverage. Actually the word sake is also used as a generic work for all alcoholic beverages. But lets talk about the type most commonly known outside Japan. Sake is sometimes referred to as rice wine, but it is not really a wine as it is brewed like beer. But it is very different from beer and actually should not be compared with either beer or wine. Traditionally sake is drunk chilled like wine, something which surprises many non-Japanese. The tradition of drinking heated sake started in the wintertime and people quickly discovered that really bad cheap sake tasted better heated than chilled. Personally I drink it both ways but the good stuff I never heat up. Sake also does not store well and should be drunk within a year of bottling, if you have some sake that is a little old and does not taste that good just heat it up. Usually a flask in a microwave for 30-45 seconds is enough, you don't want it really hot. Of course this assumes you are old enough to drink.

Well I hope this article has been informative and has given you a little insight into what you have seen when you watch anime or read manga. If you want to find more information of this type find my book the Anime Companion in this catalog and order it. In fact order several and give them away as gifts.

**When will Dragonball GT come out?**

Funimation says that they will begin Dragonball GT when they have finished the colossal series of Dragonball Z. Who knows how long that will be. So patience is the virtue best suited for this series.

**How often DBZ released?**

Much like charting the Bermuda Triangle, there is no way to calculate and predict when Funimation schedules new releases of Dragonball Z. About every other month - check out our website for details.

**Is there a third series coming for Tenchi?**

The makers of Tenchi have gone on to other productions, and Tenchi's future looks grim. It was announced by Pioneer at the time of its release that the 3rd Tenchi movie will be the "end" of Tenchi.

**What is the difference between the TV episodes and the regular tapes that are listed in the catalog?**

This varies depending on the show. Manytimes the TV episodes are censored. (The TV hate doing it as much as you hate them doing it) Censoring is done to coincide with the regulations that TV broadcasters must abide by. This can involve the removal of Nudity, Excessive Violence, Blood (sometimes just a change from red to green makes a difference.), and the naughty words. The non TV versions often-times have the episodes in their original form and you get to see the show as the producers intended. You can note this by "TV version" or "Edited" in the title block.

**How long does it take to ship an order?**

From the time we receive the order and place it in our system, standard Processing time to ship it is 24-48 hours. If some of the items are on back order, (unless you chose to partial ship) it can take an average of 10-14 business days for us to receive the back ordered items. Then standard Processing time goes into affect. Please note that partial shipping oftentimes is an additional charge.

**What are your methods of shipping?**

We ship a lot of different ways. Our Standard shipping is UPS. If you have a PO Box, live outside the Continental US, or are stationed in the service, our standard shipping is Priority mail through the US Postal Service. For those of you who have to have those new videos as soon as possible, for a few extra bucks, we can send your order Express. Please see back of Order form for more details and prices.

**Why do we request copies of ID and DL from the international customers?**

We request them to make certain that you are the Credit Card owner. We do this for your protection, as well as our protection. With online crime on the rise, one can not be too careful. Protect yourself.

**What does "\$4 catalog refund" mean?**

When you pay for a catalog, you are allowed to take the \$4 charge off your next mail-in purchase. That way the catalog winds up being free, and you get to keep it forever at no additional charge (what a deal)! See the Stuf STUFF! Section (page 241) in this catalog for your coupon, and don't forget to mail it with your order!

**Didn't your catalog used to be \$3 ..?**

It didn't used to be this many pages.

**Why are some of the products this year in a sealed section?**

Products which are adult are in the sealed section. Although not every product in the book itself is suitable for children, those products are definitely for adults only. For products suitable for all ages, check for the "All Ages" tag on the product. Some products in the regular section are not suitable for young children, but are not deemed adult, either.

**Do you have the color Astro Boy (1980) series?**

Not at present, as it has been delayed a number of times (for almost as long as Kimba was for us, actually). However, we have heard the possibility that this will show up sometime in 2001. Also of note is the Astro Boy feature film which is being produced by the Jim Henson Creature Workshop. The tentative release date of this movie is sometime in mid 2001.

**Is there any news of "Kimba"?**

Yes, it's out. Not only can you get the 1990 series from Pioneer (available through this catalog), but you can also get the 1966 series from us (also available in this catalog). Note that our officially licensed release contains all the original music and dialogue, just like you remember it!

**Speaking of Tylor, is there any way I can get those out-of-print soundtrack CD's?**

Yes ... from us. We at Right Stuf have launched a new music label (Stuftoonz) which specializes in soundtracks. These CDs (which are anticipated to have list-prices less than \$16 for single disc packages) will hopefully be available sometime in the late fall of 2000. The first two titles are a Tylor TV soundtrack and a Tylor OVA soundtrack. More will likely follow ... hit our website for more current information.

**What's the difference between subtitled and dubbed?**

Subtitled tapes display the dialogue on the bottom of the screen while the actual voices are still in Japanese. "Dubbed" in this case means the music (probably) is intact, but the voices have been redone in English. In our online system, you will note that subtitled is represented by "(S)" and dubbed is represented by "(D)". You might also see "(Hyb)" which means that both the subtitled and dubbed versions are available on the same DVD.

**Why are subtitled tapes more expensive?**

"Conventional video industry wisdom" is that broad market penetration requires a low price (and that's where dubbed tapes are aimed). Subtitled tapes are "the domain of purists", and are only a small part of the overall market (we're not saying that's correct ... only that is what the "people who know" say), but the market is changing and dubs are outselling subtitled tapes in most key categories. Actually, this whole thing will soon be moot anyway, as many manufacturers are discontinuing VHS subtitled tapes altogether in favor of DVDs. Many in the industry feel that in two years or so there will be no VHS tapes, period.

**How come < place title here > isn't available dubbed?**

There are several titles out there which are still available only in subtitled form (there are also several in which the opposite is true). The choice of whether to make dubbed versions of already existing programming can be complicated, and manufacturers need to feel that the investment in time and resources necessary to dub the program can be turned into a reasonable profit. You will find that many of the anime publishers are dubbing their back catalog of programming at this point, as the anime dub marketplace grows.

**Why would I want a dubbed tape? Dubs suck!**

You may not have heard one in a while, and you should probably listen to a new one. While a dubbed tape stands on its own and is changed somewhat from the original Japanese for a number of cultural (and lipflap) reasons, they've actually gotten much better than they used to be. The Bebop dub is very good indeed. We're sometimes told that the Tylor one is pretty fair, too.

**What are your hours?**

There's someone in the office most of the time, but we answer the phones only from 8am to 5pm Central time Monday through Friday, and a skeleton crew on Saturday (we've got to fill out the paperwork sometime). You can FAX your order 24 hours a day, 7 days a week at (515) 252-0555, or you can also place an order electronically on our website (<http://www.rightstuf.com>) using your web browser.

**What's this "Got Anime" thing?**

It's an easy way to get an additional discount on your tape. A yearly membership fee entitles you to additional discounts on all videotape products in our catalog (and gets you a groovy "Got Anime" bumpersticker, a quarterly update and members only specials). More information on this can be found elsewhere in this catalog.

**Do you ship COD?**

No. Few companies do it any more, in fact, because of the possibility of fraud. Sorry.

**Do I add sales tax?**

Only if you happen to live in Iowa.

**What's with this thing that "bill to" addresses must be the same as my credit card billing address?**

Credit card fraud has forced us to make this change in our policy. All it means is that your "bill to address" has to be the same place as where your credit card bills come to. More and more companies are doing this (particularly if you order computer games mailorder). Our company uses an address verification service to authorize transactions and you may be contacted if these addresses do not match.

**What's this NSF charge?**

"Non-Sufficient Funds" means, in English, your check bounced. This is bad. We will charge you for this. There is a \$25 charge for all returned checks.

**I'm not at home during the day. Can you ship to my office?**

Certainly (in fact, we prefer to do this to ensure that you actually get your stuff), but please give us all the information that you can, including the name of the company, so that your friendly delivery person can get your package to you. We will need to get your billing address also on your credit card, so give that to us too. We are happy to work with you to get the product to you as quickly as possible, but for American Express cardholders, this is not allowed.

**Why do you hold my order when I pay with a check?**

Even with all this cool technology, checks require at least 18 days to clear. In a perfect world, this would not be so. Amazing, isn't it?

**Can I get a new order form / Do I need an order form / I ran out of order forms!?**

You can give us the information on the form on any scrap of paper. As long as we can read it you are fine. Note: If you don't think we can read it, likely we won't be able to. Actually, there probably are SOME kinds of paper that would be a poor choice for making orders on ...

**Do you take Discover / VISA / MasterCard / American Express / PayPal?**

Yes to all. We also accept JCB cards and debit cards which have the Mastercard or VISA logo. We also accept payments on our website from Paypal, too. About the only plastic that we don't take are standard ATM and gasoline cards.

**If I order using my credit card when do you charge it?**

Credit cards (by law in our state, actually) get charged only when the product actually ships. Unless there is some freaky deposit problem, that's the only time.

**Is "I didn't like this tape" a good enough reason for me to return it?**

Sorry, no. Defective tapes can be exchanged for another copy of the same tape within 30 days, however.

**When I got my tape of < insert title here >, it was bad. What do I do?**

Call us or send e-mail to us for a return material authorization (RMA) number. We'll give you the complete directions when you call. The book says that this happens about 1½ times per 100 tapes. Recently, there was a rash of one particular title which was screwed up at the duplicator but this is a rare occurrence.

**Why do DVD's always seem to be late?**

There are a number of reasons for this, but most revolve around the comparative newness of the format. Mastering is still difficult (although more readily accessible than a year ago).

**Why does THIS DVD look so much nicer than THAT DVD?**

Like many things, it's the talent of the people who did the mastering. Although the format supports a very high quality image, the preparation of the material determines how good the final will actually look. This can also be seen in many non-anime DVD's that came out the door first.

**What is the difference between PAL and NTSC?**

The United States, Canada, Mexico, and Japan utilize the NTSC television standard. Western Europe, Australia, Great Britain, and much of the rest of the world use a different standard called PAL. In Russia and former satellite countries, they use another broadcast standard called SECAM. These three standards are not compatible with each other. All of our programming is in NTSC; if you are in a country which utilizes another standard, you will need multistandard video equipment that will allow playback of NTSC video and this can be expensive. We do not sell PAL or SECAM tapes.

**How long is a typical item "out of stock" for?**

With a few exceptions, VHS tape delays can be measured in days. There are some freak delays, but a week (or two at the most) is a usually safe figure, and is what we'll likely tell you if you ask. However, please keep in mind that some items are directly imported from Japan, and may be in short supply even there., and should the vendor be out of stock at the time of our resupply order with them, it may be a bit longer. We keep thousands of items in stock, and our computer system automatically adjusts stock levels based on demand. Hal, you can open up the doors now.

**I keep hearing about affiliate programs - what are they and do you have one?**

Quite simply, an affiliate program is a way for you to make money when people come to a commercial site from your webpage. Let's say you put one of our banners on your webpage and link it to us. If someone buys something from us, then you get a fixed percentage (10%) of their total order. Of course to get the money, you first have to sign up to be one of our affiliates. For more information check out our affiliate information page.

**I chose express delivery and my product still took 2 weeks to arrive. What's up with that?**

You must have ordered a product which we didn't have stock on at the time that we received your order. If an item is out of stock when we receive your order, we still ship it out by express delivery the moment we receive it from the manufacturer. Although we do keep significant stock on the items in our catalog, there are times when there may be delays getting items from the manufacturer, as discussed above.

**I ordered something in your book and you told me that it was discontinued / why did you list it as being available for sale?**

There have been cases where products were released and then sold out during the lifetime of the printed catalog. Also, some specific products are in short supply (this is particularly true of import artbooks and specialty goods). For some types of product we must count on the manufacturer to keep us informed when something goes out of print or will no longer be produced, and sometimes we don't get a straight answer until after we call them to follow up on our order a third time. We do our very best to get the product that you ordered to you as quickly as possible. If your product has been discontinued, we will work with you to select a different one or return your payment to you. We know that this can be incredibly irritating, and we stock up on items we feel are going to sell strongly to avoid this problem as much as possible.

**Why isn't < insert title here > available in the US?**

You might be surprised to find out how much of the Japanese product is available in the US. Of the few titles that remain unlicensed, some have their rights disputed, some licensors want more money than a title can possibly generate in this market, and some are currently in negotiation. With the exception of some television series (which are a different matter entirely, due to their length), this just about covers it. We do not sell fansubs of non-licensed products, or pirated copies of licensed tapes. We're sure you can find someplace else that will do that for you if you feel the need.

**How much does it cost to ship product overseas?**

That depends entirely upon the weight of the package, how fast it has to get there, and exactly where you are. Please contact us for specific information.

**What happens if my country will not allow me to have this sort of tape/ My order was seized by the border ... what now?**

Sorry. Please consult with the postal authorities of your country prior to placing an order for adult product. We will not be responsible for seized shipments, and cannot provide refunds for seized products.

**I'm an international customer. What's with this extra data you need?**

For a variety of reasons, we now require all first-time international customers to furnish us with a driver's license or passport photo (or something like it), along with a photocopy of BOTH sides of your credit card. We need to know for certain that you live where you say you do. International mail and credit card fraud is a large and growing problem, and we feel that this is a better option than to charge everyone outside the country a lot more for their stuff. This policy only affects first-time international buyers, though. We will retain this confidential information for all future purchases you make with the Right Stuf International.

**How much is shipping for Prepacks?**

Shipping is simple: use the amount for a SINGLE item. International shipments will still be determined by weight, scheduling, etc ... contact us for more information.

**What is "Mosaic" / Why does my movie have it / What does it do to the movie?**

The Japanese rules on what constitutes spooze are frighteningly complex ... and variably enforced. The digital "mosaic" effect is sometimes placed over the relevant bits during a particularly adult sequence prior to the title being exported from Japan. What is most interesting is that a mosaic or other censoring technique will sometimes deliberately be placed in a film to make it more mysterious (imagination being nastier than anything that can be shown). For the vast majority of the time, this effect is not present or has been removed by the US licensor prior to US release. When we know its there, we'll mark it as such in the title description for your information.

**What's the difference between Urotsukidoji Perfect Collection, Volume 1, Volume 2, Volume 3, and Volume 4?**

Here's the deal. Volume 1 (dubbed) and Volume 2 (dubbed) were cut together from the original five installment set (now known as the Perfect Collection, and available subtitled only). Urotsukidoji 3: Return of the Overfiend and Urotsukidoji IV are new series in themselves, and are available dubbed only. I know, it's like trying to figure out the sequences of the VIZ Ranna series sometimes.

**I went to your on-line ordering system and I wanted to order, but I didn't have a credit card? What do I do?**

You can order from the printed catalog by mail, or, should you prefer, you can also use the on-line ordering system to place an order by selecting the items that you want, and then choosing "complete order." This will bring up a screen which will ask you to choose if you wish to use our secure processing server, or if you would prefer to print your order out and mail it in with payment. This way, you can use the on-line system to order using a check or money order, or even a credit card if you are not comfortable sending this information over the internet.

**Why do the characters in anime all have such big eyes?**

Mostly, it's because Osamu Tezuka drew his stuff that way. The effect that Dr. Tezuka had on the anime industry in the very early days (and on the Manga industry before that) changed the way that a lot of people made things and it's still being felt today. This isn't a bad thing, either. Frankly, I think everyone should watch some Astro Boy and read Hi No Tori manga, but that's just me.

**If I move, should I inform you?**

Certainly a good idea (Stuf would be the FIRST notice I'd send if I were you), especially if you want to keep getting stuff from us. Just drop us a quick note, giving us your old address, and your new address, so that we can update our records.

**I saw this tape that I think was Japanese. Do you have it?**

We get questions like this all the time in the company Email box. If you can give us enough information, someone (it winds up being the catalog designer on the tough ones) can usually identify the program. Please understand, though, that if you ask us about something where "there's a girl who's like a magic user, a guy with a sword who has big hair, and a villain who wants to take over the Universe, and I think there are some catgirls in it" there's a problem. This describes about half the films ever made. Also, knowing what a series or movie is doesn't mean that it's available in the US as a licensed product but it's more likely than ever that it is.

**What's the most horrible and tasteless videotape you offer?**

That really depends largely on the person you ask. If you ask the catalog designer, he'd say "Cool Devices" or perhaps "Angel of Darkness." These titles are certainly not for the squeamish, and are most definitely only for adults.

**What are some good tapes for young children?**

Although this is truly a matter of personal preference, we recommend Totoro, Kiki's, Pokemon, Kimba, and Astro Boy (especially the 1966 one!) for young anime fans. You might also consider the Sanrio titles like Hello Kitty, and Pochacco. Look for the "All Ages" tag for child-friendly titles.

**I really want to learn Japanese. What resources do you have?**

There are a couple of books in the catalog which might be of interest - particularly "Basic Japanese Through Comics" and "The Anime Companion." The internet is an excellent resource. Check out <http://dmoz.org/Reference/Education/Subjects/Language/Resources/Japanese/> Also, you might check with local school districts and community colleges to see if they have any courses available.

**When does your next catalog come out? Will I get your next catalog?**

Don't ask ... but probably next fall. Producing this catalog is a Herculean task (and even though there is another person writing copy these days, the production staff is still pretty much ONE person), and getting information from some industry manufacturers is difficult at best. We do post monthly updates at our website, for those of you who have internet access; as well, you might consider joining our purchasing club, which has a mailed periodic newsletter mailing of new programming. If you've ordered something from us in the last year, you will automatically receive the new catalog when it is shipped. If not, you may find that you'll stop receiving catalogs (and you will have to send us the current catalog fee to reactivate your catalog status).

**I saw some titles in the catalog for like \$5, are these prices right?**

Yes, they are. Occasionally, we are able to get an incredible buy on some products. When we do, we pass those savings along to you. Many times, super-specials such as these are available in limited quantities only, but they do have the same guarantees as any other tapes (ie: these are not "seconds"). Also, we do post weekly specials on our website. Check them out!

**Where are the Tylor DVDs? I've been waiting forever for them!**

Visit the website for current details, as the final policy is being ironed out on these. Expect to see them sometime in either very late 2000 or in 2001.

**I hear you guys got Kare Kano (Kareshi Kanojo no Jijo). When ..?**

The company did, in fact, license this excellent GAINAX show and is in the process of preparing it for a US VHS / DVD release. Please be aware that the guy who does the catalog is also doing a whole bunch of work on that too, so it might take a while. Trust us ... he's very aware of how cool this show is and doesn't plan on taking any shortcuts on it. Heck, he was the one fighting to acquire it in the first place. Visit the main website for current details or join the EGroups mailing list.

**Why do you charge for your catalog?**

Paper costs money. Surprisingly, electrons don't ... download one for free from <http://www.rightstuf.com>. Personally (speaking as the person who makes this thing every year), I think it's worth the money ... maybe it's just me again. If you place an order every year or so, it's free anyway.

**Why do you have so much cool stuff? I'm going to be broke for months!**

We hate to say this, but there's even more neat stuff in this catalog, so you might as well just sign over your first-born to the company.

This animated version of the live-action classic is SO not anime it's not funny ... it's far closer to Bluth (I'm not going to say the "D" word, even though we're near that too)!  Circumstances just aren't usually too fair for Kei and Yuri ... it's not always their fault that the planet they're working on happens to blow up after they're done and billions of people die (although sometimes it is). This time around, they get called into a secure area when the local prisoners riot and take their warden hostage. What these miscreants don't understand is that no amount of reinforced concrete can stand up to that hand cannon that Kei lugs around! -JT

To say that The Mob is the most powerful force in the universe is just common wisdom ... but common wisdom doesn't always recognize how much damage two girls with big guns (and few inhibitions about using them) can do! Of course, should the shady world of organized crime and the WWWA's best known trouble consultants intersect ... can the explosions be far behind? -JT

Computers NEVER make mistakes, right? I mean, it's not possible that the central WWWA computer would assign a very demanding task (a REALLY tough one) requiring finesse and restraint to a team of agents who possess none of those things? Although there is a Kei, a Mughi and a Yuri, these two don't look a whole lot like the trouble consultants for the WWWA that we've all come to know and love. By all rights, Flint Hammerhead should be more than a little annoyed at his situation. Turned to stone in the distant past by Petra, Flint along with his father Rocky and not discovered until the 25th Century, he's still guarding his charge for reasons that would baffle many. Still, it is this act which prevented Get along (one of the timeshifters) from falling into Petra's greedy hands! There are many more of these timeshifters scattered throughout history (each with its own unique power), and it's a race between Petra and Flint to find them! If Flint succeeds, they will be collected at the Bureau of Time and Space Investigations and used to repair the damage to the fabric of the universe. If Petra finds them first and stamps them (which not only controls them but turns them evil) then they become a rampaging force which will destroy everything! This has got to be some kind of first ... a giant robot show without the giant robot. Instead of rocket powered fists and tail fins in space, we have a life and death struggle by one member of the original team with an almost incurable illness. This is an excellent film that almost no one seems to know about. -JT

These three movies form the introduction for the entire rest of the series (the events here are the same as the original TV series), so we recommend that you start with these even though the animation doesn't look anything like the later volumes. Running Time: 48 Minutes

**SUB** Catalog #: AV1120 List: \$24.98 Sale: \$22.48

We've all thought at one time or another that our school isn't quite normal ... that there is something decidedly odd about the people around us. In Yoto Hokujo's case, it's entirely true though ... he's president of the Saints Club (an innocuous sounding group if ever there was one) and one of the few of their ranks who is ... alive! All he wants is out, and to do this he needs to collect a series of badges (he don't need no steenkin' badges), but that's not as easy as it may sound! -JT

Running Time: 48 Minutes

**SUB** Catalog #: AV1121 List: \$24.98 Sale: \$22.48

Even if the rest of a typical school isn't weird, the Principal's office surely is! That's another one of the things that the Saints Club has learned while investigating the plight of a soul who just can't quite seem to cross over to the other side as she should. -JT

Ninokimi's nowhere to be found! Annoyed more than concerned, a simple and immutable process begins in an effort of call him from wherever he's gotten to ... and he STILL doesn't show up! Since this is a foolproof and certain process ... something serious must be going on! -JT

Running Time: 48 Minutes

**SUB** Catalog #: AV1124 List: \$24.98 Sale: \$22.48

Kasuga Kyosuke's just an ordinary guy who happens to live with a pair of younger (read: basically psychotic) non-identical twin sisters, his dad and one overweight cat. To make his life more interesting, those sisters are also powerfully psychokinetic and only one of them has developed any sense of discretion. As you might infer, this had lead him to a number of embarrassing situations ... but that's only part of it. Not only are they not the only paranormal ones in this story, but that's about the LEAST of the things that are going on. Although this is a fairly pricy series to acquire, the first half at least is an effective and sometimes remarkably poignant story. Contains episodes 1 ~ 4. -JT

Something very strange is going on ... people are saying that Lain is spreading their secrets (and in this culture, the most precious commodity is information) through the wired world, but Lain herself (although accused) isn't doing it! But, as there are two worlds (the real and the virtual), there may well be two Lains ... and ONE of them is in fact doing this! -JT

Having destroyed her creator, she is now forced to consider doing the same to herself and eliminating all references to her in everyone's memories. There's an old saying (and unlike many old sayings, this one has more than a bit of truth to it) that if it's too good to be true then it probably is just that. When an evil sorcerer seemingly changes miraculously for the better, it seems prudent to suspect his motives. This skepticism is a really healthy thing, since what appears to be happening bears little resemblance to what really IS happening! -JT

Star Blazers (Uchu Senken Yamato) is one of the most significant television series in the history of anime. Not only was it a groundbreaker once the Japanese caught up to it (after Star Wars came to Japan), but Westchester Films' dubbing is unusually well done. While it does stray at times from the original Japanese, it certainly retains the tone of the original, and there are those who argue that Deslock is better cast in English than Desular was in Japanese! Don't you hate it when someone loses the map and you're a long way from home? In this case, the way home is a spell which has gotten splattered on five different elves (the fragments are somewhere on each of their bodies). So, the task boils down to ripping the clothes off as many of the local elf population as necessary until the spell can be reassembled. Sounds like a lot of elf nudity will be involved before THIS one's over. -JT

Tylor, a man so complacent that he'd give granite a run for its money, has through a unique set of circumstances been given command of a space cruiser in a time of war. With a crew that hates his guts, a command staff who hates his guts, and an enemy who hates his guts you'd think his time alive would suddenly become quite limited. You'd be wrong, too. This is an excellent series (a fan favorite for many years) ... and I'm not just saying that because it's one of ours! -JT

Unable to make the Soyokaze disappear any other way, the Brass has figured out a way to keep Tylor from doing anything else to embarrass them: downgrade the ship and therefore prevent him from ever being in the right place at the right time. Tylor, however, has other ideas ... and there is ONE way for him (and Yuriko) to prevent this! If you expect Tylor to do something he's supposed to, though ... -JT

The Soyokaze is out of hot water with the UPSF ... but the Raalgon (and in particular, one commander and a sizable portion of the fleet) don't feel the same way. Out for blood, Admiral Donan is looking for the brilliant tactician who defeated him when the last met in battle. He will stop at nothing to clear his name and it's a pity that Tylor is the object of his attention! After all, people out to get him don't usually last very long! -JT

Dom has decided that Tylor poses such a significant threat to the continued existence of the Raalgon Empire that he's instructed his agent to capture him at all costs. Earlier in our story, this would have largely been a no-brainer ... but Harumi has significantly changed since she joined the Soyokaze's crew. Still, orders are orders and her allegiances are clear ... or are they? -JT

Tylor (and the Soyokaze) now have another supporter of sorts ... none other than Princess Azalyn herself! Many of the things that she's been told have proven not necessarily to be the case, and she has learned that sometimes what seems to be right even though your education and common sense says is wrong actually is the right thing to do. She will have an uphill fight to prove this, but that too will have to wait ... Tylor is dying! -JT

The time has come for a decision in the Azalyn affair ... her subjects are about to stage a raid in order to get her back on Raalgon soil, and the UPSF are itching to get her themselves for the likely end of this conflict. What everyone is forgetting is that Azalyn has a mouth and her own set of opinions, so she devises a plan to get exactly what she wants. Daring? Oh yes. Will it work? Well, she HAS been hanging around Tylor for a while now. -JT

The war is over (well, the shooting's stopped), but perhaps Tylor's greatest challenge is now in front of him. One of his reasons for living has been taken from him, and this affects Tylor in strange and subtle ways. Still, the entire UPSF is at his feet and he is by all accounts a hero ... he can get anything he wants from a military hierarchy which previously wanted him dead. The one thing he wants, however, no one can give him ... not even Yuriko. If you thought Tylor was great before, watch THIS tape, but do yourself a favor and wait until you've seen the rest ... this ending really is THAT good! -JT

The shooting war is over. The undefeated Soyokaze has returned home and all should be right in the universe. It's not ... the Raalgon Empire has created an incredibly powerful and destabilizing new weapon system. With the urging of the Prime Minister, they're about to deploy it and when the UPSF forces realize this the choice is clear. These are desperate times ... The shape of the future will be determined by the actions of very unlikely allies. Their choices will be difficult and their situation may well be hopeless. Any hope for galactic peace rests on the most irresponsible man in history. Perhaps Tylor will stay awake for this. -JT

Many years ago, Azalyn's best friend in all the universe was a similar aged boy named Ruu. Also royalty of a sort, they shared the way that children do and both pledged that one day they would rule fairly. Both also agreed that one day they would meet again. While on vacation years later, Azalyn encounters a mute and unresponsive Ruu along with a family retainer ... he's been this way since Azalyn's father ordered the insurrection lead by Ruu's family to be crushed. Should he regain his memories, he will once again lead the charge and war may begin once more. Dom realizes this. The Ashran people realize this. The Raalgon court recognizes this. Azalyn, however ... -JT

It appears the time of relaxation from the many battles is over ... and that someone is following Yuriko! Of course, it could be the product of an overactive imagination (which she's never had before) or a series of coincidences (which seems even less likely). It could also be that someone ... either a UPSF agent or a Raalgon spy ... is out to make the relative peace a thing of the past! And, best of all ... here's your chance to see Makato Yamamoto: Action Hero! Due 10/24/2000. -JT

Busy in their own labs, they've developed a class of new ships and are about to deploy them for the first time. Normally, the Raalgon Empire would be able to defend itself, but something very odd is going on there, too! Will the Soyokaze crew be able to sort all this out before it's too late? Will this be the end of Tylor? Actually ... yes: this is the end of the show! Expect to shed a tear or two with this one if you're actually breathing ... it's THAT good! -JT

When the thief offers them a cut of the ten million to join him, their response is rather pointed - like a knife in the back. Then again, their methods usually lack a certain subtlety. Shooting through a maze of civilians isn't exactly a maxim of law-enforcement handbooks. At worst, Japanese artbooks are some of the nicest things that are turned out on the other side of the Pacific. The problem is that there are never quite enough of them to go around ... while some books are still around years after a TV series goes off the air, others appear and disappear in a matter of months. Regular STUF customers know this only too well: we've had our share of books go out of print after a single reorder! To fully appreciate this, you have to understand that most of these have a VERY limited print run and many have only a few printings ... some have only one. Worse, the Japanese have a habit of pulping books that don't sell out quickly (shudder): many books that should be in the back catalog simply don't exist. Therefore, we URGE you to order the books that you are looking at early and be patient as they arrive since they will almost certainly take longer to arrive than anything else you can order.

Unless otherwise noted, all books are printed in Japanese with odd smatterings of English thrown about (sometimes wildly constructed English at that). If you are looking to actually read some of these, expect to take some courses in Japanese or latch onto someone who can help. Still, even with the language problem these are the coolest thing next to cels that you can buy, and even with the reprint problems they're easier to come by than original artwork (particularly now).

If in doubt, please give us a call and talk to our friendly office folks. If they can't help you they'll point you to the people who can.

# CELS

A few words of explanation:

Chromacels: In appearance, Chromacels are very like serigraph prints. Unlike actual production cels and limited edition presentation cels (which are painted on acetate by hand and therefore a bit pricey) these are mass produced ("printed" on acetate), but there IS a limit to the run. When this edition size is met, that's the end. This edition size, where applicable, is listed after the cel name. If you want them, ORDER SOON! If this catalog has been out for a while, please give us a call so we can tell you if the cel you want is still available. We've been both lucky AND unlucky in the past with some of these!

### Special Notes for our International Customers

Shipping companies may charge a fee for delivering your package to a foreign country. Such fees and customs duties are not included in our shipping price, and are your responsibility. We are not responsible for shipments seized outside the US. Please check to make sure you are in compliance with all local laws if you are ordering adult product. **For first time orders, we require a copy of your ID (can be drivers license, passport, etc) along with a photocopy of BOTH sides of your credit card.**

- We cannot process COD shipments at this time.
- Note that when paying by PayPal, your shipment will be slightly delayed. This is due to the lag between the time you authorize PayPal to release funds and the time we get payment.
- You can use **MasterCard, Visa, American Express, JCB, PayPal** or **Discover** on your order. You can't use your Mom's Sears card ... or your Dad's Amoco card.
- Please make all checks or money orders payable to **The Right Stuf International, Inc.** Checks will require at least **18** days to clear. No international checks, please.
- Please allow **2-6 weeks** for delivery. It will almost certainly be closer to 2 than to 6 weeks, but we like to err on the side of caution.
- Express shipping typically means that your order will arrive at least one week sooner than standard shipping. These are shipped either via **UPS 2nd day**, or **Priority Mail**. Express shipping means that if you order by credit card and we've got the item in stock (even more likely now), you will receive it in very short order. If, however, it's out of stock (either here or from the manufacturer), then you'll have to wait for it regardless of the shipping method you choose.
- You are hereby authorized and deputized to **use copies of this order form**. As long as we can read it and all the information is there, you're fine. Xerox away.
- If you are willing to accept a partial shipment (and are paying by credit card), please indicate this in the box on the reverse. That way, your five tape order shouldn't be held up by that one tape the manufacturer smoked. Please note that partial shipments may incur an additional charge on your credit card.
- Please understand that many of the preorder dates shift about without the manufacturer letting us know. If you're ordering something projected into the future by a fair amount, call us.
- If you get a defective tape, please call for return instructions. Note that packages damaged in transit by UPS are not defective: to remedy that situation, please call (800) PICK UPS. If the package was delivered by Mail, then contact your local postmaster. We cannot accept any product back without an RMA (RMAs expire in 30 days!). If you're still unsure about what to do, please contact us!
- **Please make sure that there is someone at the address we are shipping your product to who can sign for your package. When we ship by UPS, to ensure that you receive your merchandise, we require a signature. If someone will not be available at your home, consider having the package shipped to your work address (include your company name). If your package is returned to us, we will charge you for additional shipping to send it out again.**
